About the Institute

Vemana Institute of Technology (VIT) is a premier institution dedicated to providing high-quality education in engineering and technology. Our mission is to cultivate innovative and skilled professionals ready to meet the demands of the modern technological landscape.

About the Department

The Department of Computer Science and Engineering at Vemana Institute of Technology is committed to excellence in education, research, and innovation. We strive to equip our students with the knowledge and skills necessary to thrive in the rapidly evolving field of computer science.

Theme

Computer Networks and Load Balancing: Fundamentals, essential devices, and optimizing network performance through load balancing.

Agenda

This workshop covers the basics of computer networks, including the OSI model, TCP/IP, and different types of networks. It explains network devices and introduces load balancing, followed by a hands-on session to create a simple load balancer. Real-world case studies, a Q&A session, and additional learning resources are also included.
