

Course Outcomes &CO-PO-PSO Mapping and Justification

Subject	Automata Theory & Computability	15CS54
COURSE OUTCOMES:		
CO No.	On completion of this course, students will be able to:	Cognitive Level
15CS54.1	Construction of DFSM, NDFSM, regular expressions for the languages and minimizing the DFSM.	L3
15CS54.2	Understand the concept of converting NDFSM to DFSM, FSM to regular expressions and regular expression to FSM.	L2
15CS54.3	Remembering pumping lemma for regular languages and context free languages.	L1
15CS54.4	Construct a CFG, parse trees and PDA.	L3
15CS54.5	Understand the concepts of converting grammar to PDA and PDA to grammar.	L2
15CS54.6	Understand the working principles of Turing Machine and post correspondence problem	L2

CO-PO-PSO JUSTIFICATION

CO No.	PO/PSO	CL	Justification
15CS54.1	PO1	3	Basic Mathematics knowledge such as set theory, relations, functions and proof methods (induction, deduction, and contradiction) are used for verification of properties. Apply theory and principles of computer science engineering to solve an engineering problem.
	PO2	1	Classification of real world problems such as lexical analyzers, compilers, network protocols, signaling systems, etc and then accordingly providing appropriate design
	PO3	1	Ability to explore design alternatives.
	PO12	1	Describe requirement for continuing professional development.
	PSO3	2	The skills of designing finite state machines are relevant to design secure network systems.
15CS54.2	PO1	2	Apply theory and principles of computer science engineering to solve an engineering problem.
	PO12	1	Describe requirement for continuing professional development.
	PSO3	2	The skills of designing Finite state machines is relevant to design secure network systems.
15CS54.3	PO1	1	Apply theory and principles of computer science engineering to solve an engineering problem.
	PSO3	2	The skills of designing Finite state machines is relevant to design secure network systems.
15CS54.4	PO1	1	Apply theory and principles of computer science engineering to solve an engineering problem.
	PO2	1	Classification of real world problems such as lexical analyzers, compilers, network protocols, signaling systems, etc and then accordingly providing appropriate design
	PO3	2	Identify suitable criteria for evaluation of alternate design solutions and Demonstrate an ability to advance an engineering design to defined end state
	PO12	1	Describe requirement for continuing professional development.
	PSO3	2	The skills of designing Finite state machines is relevant to design secure network systems.
15CS54.5	PO1	2	Apply theory and principles of computer science engineering to solve an engineering problem.
	PO2	2	Identify the mathematical, engineering and other relevant knowledge that applies to a given problem and Apply engineering mathematics and computations to solve mathematical problems

	PO12	1	Describe requirement for continuing professional development.
	PSO3	2	The skills of designing Finite state machines is relevant to design secure network systems.
15CS54.6	PO1	2	Apply theory and principles of computer science engineering to solve an engineering problem.
	PO2	1	Classification of real world problems such as signaling systems, and then accordingly providing appropriate design
	PO12	1	Describe requirement for continuing professional development.
	PSO3	2	The skill of designing Finite state machines is relevant to design secure network systems.
