

Course Outcomes & CO-PO-PSO Mapping and Justification

Subject	Database Management System laboratory with mini project	18CSL58
COURSE OUTCOMES:		
CO No.	On completion of this course, students will be able to:	Cognitive Level
18CSL58.1	Use Structured Query Language (SQL) for database Creation and manipulation.	L2 Understand
18CSL58.2	Demonstrate the working of different concepts of DBMS.	L2 Understand
18CSL58.3	Construct a database by using data definition, data manipulation and control languages.	L6 Design
18CSL58.4	Implement and test the project developed for an application.	L6 Design

CO-PO-PSO JUSTIFICATION

CO No.	PO/PSO	CL	Justification
18CSL58.1	PO1	3	The student is able to construct the database using any SQL commands.
	PO2	2	The student can analyze a problem based on its data requirements.

	PO3	1	The student can design the structure of the tables based on the given problem.
	PO5	3	The student becomes well versed in using oracle tool (SQL PLUS) for designing database solutions.
	PO12	2	The student becomes well versed in using SQL plus for designing database solutions.
	PSO1	3	The student is able to understand the basics of database design and its core principles and apply them for application software development.
18CSL58.2	PO1	3	The student is able to retrieve the data from the database using any SQL commands.
	PO2	2	The student can analyze a query and resolve based on problem statement.
	PO3	2	The student can apply different design solutions such as schema diagram, ER diagrams for the given problem.
	PO5	3	Ability to select and apply discipline-specific tools, techniques and resources.
	PO12	2	Identify deficiencies like Assertions, Triggers and Procedures in knowledge and demonstrate an ability to source information to close this gap.
	PSO1	2	The student is able to use the concepts of database design in application development to retrieve the data.
18CSL58.3	PO1	3	The student is able to understand the concepts of DDL, DML and DCL concepts.
	PO2	2	The student can write and analyze the query and resolve based on problem statement.
	PO3	2	The student can apply different design techniques.
	PO5	3	Ability to select and apply discipline-specific tools, techniques and resources.
	PO12	2	The student can able to work with sql and front end technologies to build database application.
	PSO1	2	The student is able to use the concepts of database design in application development to retrieve the data.
18CSL58.4	PO1	3	The student gets a general knowledge about how to design and develop a mini project.
	PO2	2	The student gets an idea on how to work as a team to analyze a given problem definition.
	PO3	2	Define a problem, its scope and importance for the purpose of investigation such as Relational Design and analyze the tool such as Oracle 11g etc.

	PO5	3	The student is able to use modern tools to develop a small database project by working as a team.
	PO12	2	The student is able to perform database connectivity from front-end applications.
	PSO1	3	Students develop their own application software's. The student is made able to design and develop small sized applications using databases in the back-end.
